Subject: Microsoft Settlement

I think the US Government's settlement is unfair punishment for Microsoft.

It is too easy on Microsoft. It allows them to get a good foothold on the Education market.

Microsoft was declared a monopoly and this is not allowed in the US law. Stop the monopoly.

Microsoft should be severely punished for their practice of punishing companies who do business with their competitors. As I understand it, Microsoft will punish their partners who also partner with a Microsoft competitor. Microsoft will bully and charge these partners more money. This is not fair.

Microsoft products cost too much money!
Microsoft is a monopoly, so they overcharge their customers.

It is not fair, when products like Linux are almost free.
